Part Number

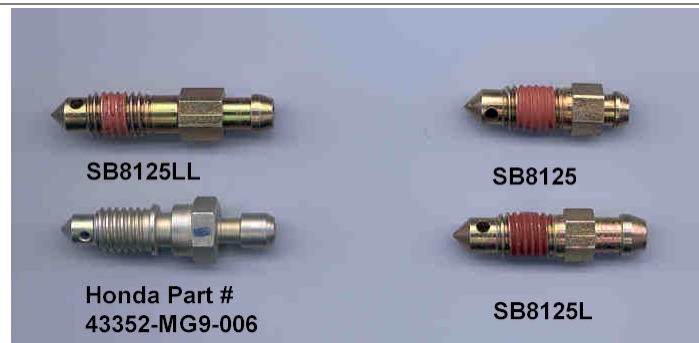

Cycle Brakes * Order: 1-800-805-2118, sales@cyclebrakes.com

Available Speed Bleeder Sizes

Honda Goldwing or Honda ST1100:

“On certain models Honda used a different bleeder for the front brakes and clutch. Before you order Speed Bleeders for your motorcycle you need to look at the original bleeder screws and make note of the differences. If your motorcycle has the Honda # 43352-MG9-006 then you need to order SB8125LL. If your motorcycles original bleeders look like the SB8125 then you can use SB8125L.

Picture is not to scale.

Cycle Brakes * Order: 1-800-805-2118, sales@cyclebrakes.com

Also available in polished 303 stainless steel.

Part Number	Thread Size	Overall Length in., (mm)
	Inch or SAE
